Table of Contents

Foreword ................................................................. v
Program Committee Members and External Reviewers .......................................... vi–vi

Invited Papers
Tractability in Probabilistic Databases
   Dan Suciu ............................................................... 1–2
On Provenance and Privacy
   Susan B. Davidson, Sanjeev Khanna, Sudeepa Roy, Julia Stoyanovich, Val Tannen, and Yi Chen ................................................................. 3–10

Invited Tutorial
The PADS Project: An Overview
   Kathleen Fisher and David Walker ......................................................... 11–17

Research Sessions
XML
Efficient Reasoning about Data Trees via Integer Linear Programming
   Claire David, Leonid Libkin, and Tony Tan .................................................. 18–29
Generating, Sampling and Counting Subclasses of Regular Tree Languages
   Timos Antonopoulos, Floris Geerts, Wim Martens, and Frank Neven ...................... 30–41
View Update Translation for XML
   Iovka Boneva, Benoit Groz, Sophie Tison, Anne-Cécile Caron, Yves Roos, and Slawek Staworko ................................................................. 42–53

Workflows
Querying Probabilistic Business Processes for Sub-Flows
   Daniel Deutch ............................................................... 54–65
Artifact Systems with Data Dependencies and Arithmetic
   Elio Damaggio, Alin Deutsch, and Victor Vianu .............................................. 66–77
Comparing Workflow Specification Languages: A Matter of Views
   Serge Abiteboul, Pierre Bourhis, and Victor Vianu ............................................. 78–89

Data Exchange
Relaxed Notions of Schema Mapping Equivalence Revisited
   Reinhard Pichler, Emanuel Sallinger, and Vadim Savenkov .............................. 90–101
Solutions in XML Data Exchange
   Mikolaj Bojańczyk, Leszek Kołodziejczyk, and Filip Murlak ............................ 102–113

The papers in this volume were presented at the 14th International Conference on Database Theory (ICDT’11), held in Uppsala, Sweden, March 21–23, 2011. Starting at 2009, ICDT is being held jointly with the EDBT (Extending Database Technology) conference. EDBT took place on March 22–24, 2011.

In response to the Call for Papers, 54 submissions were received by the submission deadline of August 14, 2010. All were submitted electronically through CMT. CMT was also used for the Program Committee deliberations, which were held completely electronically. The Program Committee selected 22 papers for presentation. The ICDT Awards Committee, chaired by Alin Deutsch, selected the paper ”Efficient Reasoning about Data Trees via Integer Linear Programming”, by Clair David, Leonid Libkin and Tony Tan, for the ICDT Best Paper Award, and the paper ”Querying Probabilistic Business Processes for Sub-Flows”, by Daniel Deutch, for the ICDT Best Student Paper Award.

In addition, there were four ICDT/EDBT keynote speakers: Dan Suciu, Jeff Ullman, Susan Davidson and Gerhard Weikum. Furthermore, Kathleen Fisher gave an invited ICDT tutorial.
